Zeeshan Ahmad

Senior Web Architect & Developer

+92 313 4435357 | zeeshan.za.ahmad@gmail.com

Summary

I've mainly worked on web applications that solve the Enterprise level use cases. To do that I try to keep myself up to date with the latest software industry trends so that I can better solve the problems of my clients. Passionate, determined, hard-working, self-motivated, result-oriented and restless professional possessing **7+ years** of experience with passion for providing solutions using my technical skill and management experience.

Services in my projects that I'd offered are as following:

- ❖ Front end Web **architectural** and development.
- ❖ **Restful** API integration, testing and deployment using **CI/CD**
- ❖ Managing the project and how to **lead** the team
- ❖ **Best approaches** to develop the cloud application from **industry nerds**
- ❖ **Search engine optimized** pages and analytical reports.

EXPERIENCE

Gradingly. Inc, Remote — *Python Django Developer*

(2021 - present)

It's an AI powered CERF based analysis system that evaluates the students who attempt exercises and tests through [QUIZ ENGINE](#).
It has a Publisher, Teachers and Reseller Dashboard to better analyze and make quick reports.

Technologies: **Python Django, AI, ReactJs**

Xnrel Canada Inc., Remote — *Sr. Front End Engineer (Team Lead)*

(mid 2019 - 2021)

It's a Saas based product company based in Canada and I worked on their **Student Information System** which is a replica of **PeopleSoft** by **oracle**. My responsibilities were here to architect the front end app and ensure all possible goodies for the app.

Technologies: **React Js**, **Redux**, **ReactStrap Ui**, **lodash**, **Ruby On Rails**

Fly Inc., Remote — *Sr. Front End Engineer (Team Lead)*

(2018-2020)

It's an all-in platform of booking flights, hotels and cars. My responsibilities were to ensure team work collaboratively on different aspects of the project with quality code/solutions for their clients or users.

Technologies: **React Js, Redux, Material Ui, Rxjs, lodash, testcafe**.

Technogeeks LLC USA — *ROR Engineer*

I've worked here in various small projects in Ruby on Rails and explored different ways of modern web based trends in the market.

Technologies: **Ruby On Rails, Chrome Extension Making, Shopify Liquid**

Alprints, Pakistan — *Co-founder & Software Engineer*

Working as a team lead to handling on-line business and development. Close look at how business processes are being run. My recent ongoing projects here are
